How it Works

① To begin earning Dexible rewards, influencers should visit this link:

dexible.io/referrals

② Make sure to be on the **Generate Referral Link** tab.

③ Enter an **email address**.

④ Input your **wallet address**. This is where rewards will be automatically sent.

⑤ Click **Submit** to generate your link!

⑥ Return anytime to view your current Stats on the **See Referral Stats** tab.

Trusted, Secure, & Proven

Dexible is Legit

Influencers are not risking their reputation. Dexible has been in operations for 2.5 years and the core team in crypto for over 5.

Our Reputation is Strong

The Dexible reputation among pro traders and hedge funds is one of integrity, generosity, and honesty.

Our Security Model

Our team is composed of former NSA security engineers who've created a robust off-chain backend.

The Platform is Quality

Dexible is a trusted platform for small traders all the way up through established hedge funds.

Compared vs. Big Names

Our performance is benchmarked against leading industry players like 1inch, Cowswap, Rook Protocol, and Matcha.

No Honeypot

There's no custody of user funds and no honey pot to target.

Refer & Earn

Early Champions get 20% back. This will change for late adopters. Get your link ASAP.

Dexible charges bps

Dexible charges 8 bps on all trades made through the platform.

Dexible Referral Links

The Dexible reputation among pro traders and hedge funds is one of integrity, generosity, and honesty.

Get Revshare for Perpetuity

Referral links are tethered to that trader's wallet. No one else can claim that trader. **Plant your flag before others do!**

Competition of Champions

Referrers are called *Champions*. **Every month**, the top performers can **earn bonuses** towards special prizes.

Getting the Referral link

Navigate to this link to generate it **https://dexible.io/referrals**.

Earn Instantly

Each trade will **automatically send** you your rewards.

Why Dexible?

7 Unique Order Types

The only DeFi platform that has market, **TWAP, Limit, Take Profit, Stop Limit, Trailing Stop Loss, and Stop Loss** order types.

Max Capital Efficiency

Uniquely splits orders to get **up to 30% improvements** over competitors from less slippage and price-impact.

Excellent Txn Success

Dexible has a **99.9793% txn success rate** versus the industry average of 78%.

Automated, Not Ad-Hoc

Other solutions have manual and instant order fulfillment and post their intent to the mempool.

No Shady Business Model

Traders get their best prices. 1inch takes positive slippage when its traders perform better than expected.

Tons of Integrations

Dexible routes through more than **60+ DEXs** across 7 major EVM chains.
